

What is EPAT®?

Extracorporeal Pulse Activation Technology (EPAT®) is the most advanced and highly effective non-invasive treatment method cleared by the FDA. This proprietary technology is based on a unique set of pressure waves that stimulate the metabolism, enhance blood circulation and accelerate the healing process. Damaged tissue gradually regenerates and eventually heals.

This non-invasive office/clinic based procedure represents a breakthrough treatment option for a broad range of musculoskeletal conditions.

What disorders can be treated?

Generally, acute or chronic musculoskeletal pain and/or pain that significantly impairs mobility or quality of life. Areas include:

- ▶ Foot and heel pain
- ▶ Achilles pain
- ▶ Tendon and/or tendon insertion pain
- ▶ Neuromas
- ▶ Trigger points

What are the possible side effects/complications?

The non-invasive EPAT® treatment has virtually no risks or side effects. In some cases, patients may experience some minor discomfort which may continue for a few days. It is normal to have some residual pain after intense exercise or a full day of work.

Elective Payment and Insurance

Insurance typically does not cover the EPAT® procedure, however, the Elective Payment option allows you to have all the benefits of an EPAT® procedure at a very affordable price. Often there can be significant savings to you through the Elective Payment option as compared to paying deductibles, multiple co-pays, and other non-insurance covered surgery, post operative surgical care and rehabilitation. This non-invasive option will be particularly appealing to those patients who are eager to return to work or normal activities in only a few days with just as good, if not better, clinical results compared to traditional treatment methods, including surgery.

How much does it cost?

For most patients, the Elective Payment out-of-pocket costs are much less than you would expect. Your physician can provide a personalized pricing program. Some patients can use their employer's "Flexible Payment Medical Savings Account" to cover these out-of-pocket expenses with pre-tax dollars.

How can I get more information?

Your doctor is the best person to talk with if you have questions or concerns about the EPAT® procedure. He or she has extensive knowledge and specialized training on all aspects of its use, safety and effectiveness.
